

**SAKURA**  
Filtration Product

# EDM Filters

# WHY Sakura EDM Filter?

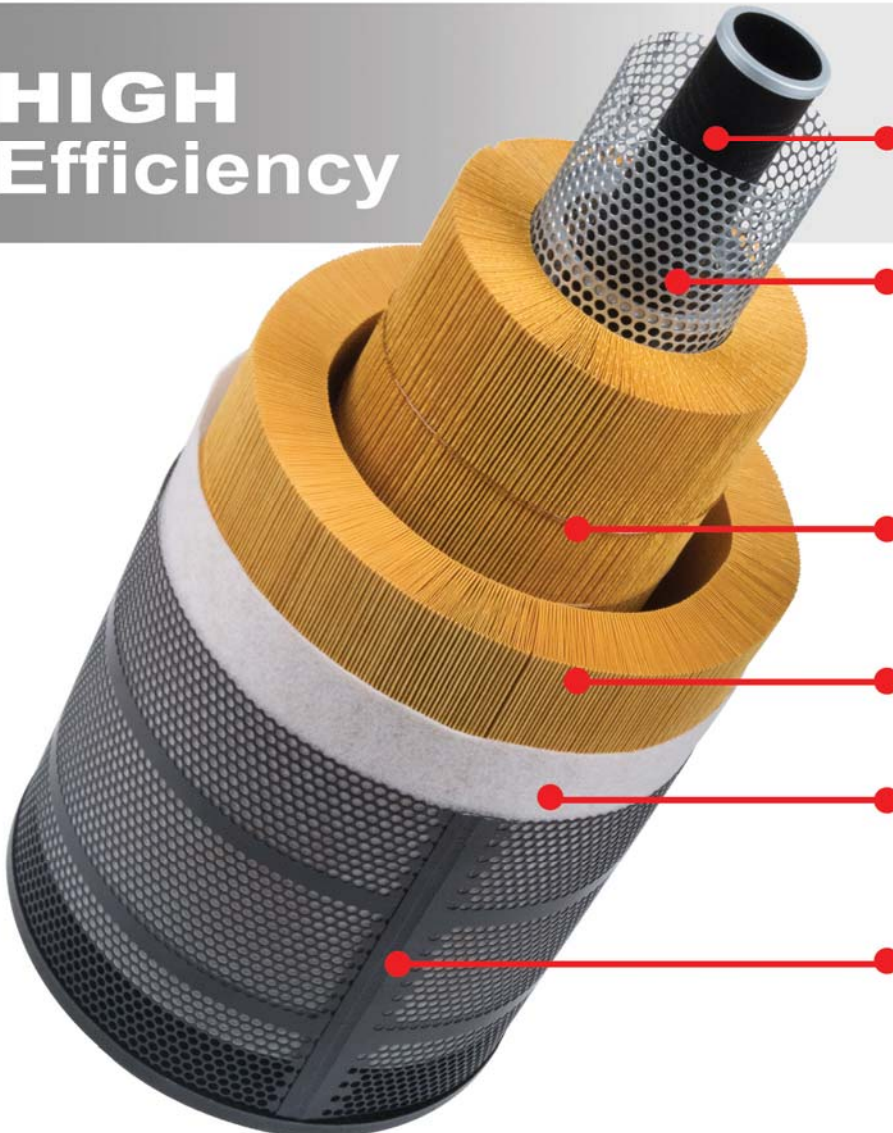

Modern and high performance EDM machines require filters and components with high performance. "SAKURA" EDM Filters is the solution for all industrial machine to optimized performance of the EDM machine system.

**SAKURA EDM Filters** offer you:

- EDM machine system reliability
- Better efficiency & performance
- Smooth running of the EDM machine
- Longer filter service life

## HIGH Efficiency

### INNER PIPE

High quality material to achieve high durability & performance.

### INNER TUBE WITH REINFORCEMENT

Provides stronger & better flow rate.

### HOTMELT BEADS

Polyamide based to strengthen the media from collapsing.

### HIGH PERFORMANCE MEDIA

Joint with intra-plastisol leakage. Offers longer service life & less restriction.

### OUTER CLOTH

Cellulose media to keep the media side surface smooth, which eliminates pleat tip wear and rip.

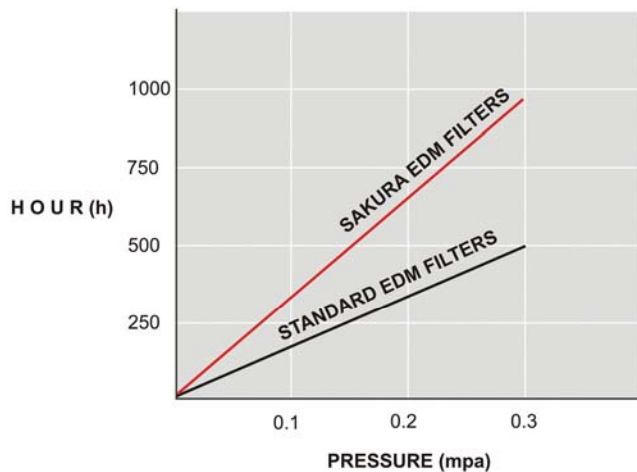

### OUTER TUBE

Seam welding joint to give better rigidity and structural integrity compared to others design.

# LONG Lifetime

Sakura EDM Filters are manufactured with high quality material and strong construction to provide optimum performance and longer life time in filtration.

## Lifetime Comparison:

Note: 0.3 mpa is a condition when the filter is clogged.

# WIDE Application

Sakura EDM Filter offers a comprehensive range of application for wire cut EDM machines, such as:

- FANUC
- HITACHI
- MAKINO
- MITSUBISHI
- SODICK
- etc.
